

BETTER SAFE THAN SORRY. KEEP EXTRA FUSES FOR YOUR A/C AT HOME

Point of info Good idea for all homeowners to keep an extra set of AC fuses for the compressor in the back of your house. Most take either 30 amp or 40 amp depending on the size of the unit Each takes 2 fuses . My unit stopped today and ilreplaced the 2 fuses and so far so good. The best place to purchase is

- 1) Maine electric just past the Cranberry sandwich shop**
- 2) Home depot**
- 3) Lowes**

(EMAILER'S NOTE: THANK YOU LARRY ("THE FUSE MAN") EHRLICH FOR YOUR INFORMATION. MAKE SURE YOU DON'T USE ANY FUSES THAT ARE LARGER IN AMPS THEN WHAT YOUR A/C ACTUALLY REQUIRES. IF YOU DO, YOU CAN DO SOME DAMAGE TO YOUR COMPRESSOR SINCE IT COULD BURN OUT BEFORE THE FUSE BLOWS.
